MotionHall Scientific Analyst

MotionHall is looking to hire recent graduates in biochemistry, neuroscience, or other areas of advanced life sciences study to join our full-time team as an important career step into a sector of private industry which is rapidly modernizing.

Responsibilities and Reporting:

As a scientific analyst at MotionHall, you will be responsible for studying and reviewing the mechanisms of action and scientific specifics of new medical innovations being developed by biotech companies around the globe. You will consider these innovations in the context of other biotech and pharmaceutical companies who can partner to continue the development and distribution of these innovations, where merited by the quality of the innovation, to patients worldwide.

The Scientific Analyst will report directly to MotionHall's Director of Quality, Derek Rodgers.

Specific Requirements:

No single path of specific previous experience is required for this job, however a good candidate will have at minimum a BSc in an appropriate area of study within the life sciences, or equivalent experience with this subject matter.

This job requires enthusiasm for innovative research in the biological sciences and high attention to detail.

Work will be completed in a software-driven environment and a successful candidate will have a high degree of comfort and fluency working or learning how to work with complex software tools and will be able to communicate as part of a remote-first, software-driven team.

The following are not necessary, but will be considered valuable:

- Experience working with programming or scripting languages, such as Python, HTML, CSS, MatLab, and/or scripting-level spreadsheet work in Excel or Google Sheets
- Comfort working with command line environments and version control software
- Experience with records and information management, and/or information retrieval software and best practices, including database software such as MySQL or PostgreSQL
- Ability to solve problems in a self-directed manner
- Strong systems thinking mindset and a deep curiosity about the world

Location: This is a remote-first role, so residence in a particular city is not required. This role is only open to Canadian residents at this time.

About MotionHall:

MotionHall is a Silicon Valley technology company and startup founded by Dalhousie graduates in neuroscience and computer science. MotionHall is venture financed by Village Global, a fund backed by Bill Gates, Jeff Bezos, and Michael Bloomberg to advance improvements in healthcare. Our global team has a substantial presence in Nova Scotia, Vancouver, and San Francisco. MotionHall's customers are global biopharmaceutical companies actively engaged in the research and development of new medicines, vaccines, drugs and diagnostics.

MotionHall's mission is to bring promising life sciences breakthroughs to patients faster and at lower cost.
